

THE NATURAL SOLUTION  
FOR SOFT HANDS

NOW  
AVAILABLE

# MANUCLEAR™ HANDSOFTENER

Having clean hands has never been as important as it is today. The COVID-19 pandemic has made all of us aware of the importance of keeping the virus at bay. However, the constant cleansing and disinfecting of the skin causes dryness, redness and discomfort. With ManuClear™ we created unique product that is a category of its own: a HandSoftener. ManuClear™ gives an almost instant gentle feel of your hands.

## **Recommended by professionals**

ManuClear™ HandSoftener is designed for those who clean their hands multiple times during the day. Whether you are a hairdresser or podiatrist, a receptionist or teacher, a CEO or sales representative, with ManuClear™ you protect yourself and your hands at the same time! This is why professionals recommend ManuClear™.

## **Natural active ingredients**

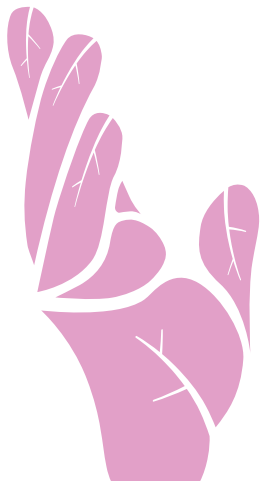

Aloe vera, often referred to as the 'wonder plant', smoothes and soothes the skin, while the other ingredients create a protective layer to prevent dryness and discomfort.

Manuka-oil from New Zealand with >20% triketones is known for its anti-viral, anti-fungal and anti-bacterial properties.

With an alcohol content of over 70%, ManuClear™ meets the standard to combat bacteria.

The basis of many of our products is Manuka-oil, a powerful ingredient with anti-fungal, anti-bacterial and anti-viral properties that have been well-documented by science. The use of Manuka-oil for medical purposes has been long known to the Maori, the indigenous people of New Zealand, and our anti-fungal spray bases its effectiveness on the oil's ability to combat and prevent fungal infections.

## Clever design

ManuClear™ offers a natural solution for your safety and with comfort for your hands. No need for a sticky hand sanitizer and a greasy hand cream. Instead, we combined the best natural ingredients to help protect yourself and others while nurturing your hands at the same time. Suitable for both professional and everyday use, ManuClear™ with its distinctive packaging can be used in your daily practice, shared with friends and family or on the go.

Squeeze a little  
bit of the gel

Rub it out over  
your hands

Wait a few  
seconds to get its soothing  
effect to experience
